NOTES:

The interview was conducted using Computer Assisted Personal Interviewing (CAPI), in which interviewers read questions from and enter data directly into a laptop computer. The script for the interview uses a variety of 'textfills' to customise question wording so that it is appropriate to individual circumstances. For example, the script will substitute either 'husband', 'wife' or 'partner' depending on the gender of the interviewee and/or the nature of their relationship.

All textfills are signalled in the paper questionnaire by the character '^'. For example, wherever the text reads ^he, the computer will substitute the appropriate pronoun; wherever the text reads ^childname, the computer will substitute the child's actual name.

Questions will also be routed on key variables – e.g. gender of participant, whether they are part of a lone or two-parent household, etc. Key routing is indicated.

The survey also included a self-completion section which was completed by the respondent by Computer Assisted Self Interviewing.

Main Carer Questionnaire

The name [^Pers[n]Name], sex [^Pers[n]Sex] and Date of Birth [^Pers[n]DoB] of each person in the household is recorded.

There is a set of these variables for each household with a provision for up to 15 people per household. The Person number is used as a suffix to the variable name (e.g. for person 3 the variable names for sex and age below would be MaHGsx3 DeHGag3 etc.)

Name [NOT IN DATASET]

INTERVIEWER: RECORD THE NAME (OR A UNIQUE IDENTIFIER) FOR EACH MEMBER OF THE HOUSEHOLD.

Text: up to 20 characters

More [NOT IN DATASET]

Is there anyone else living in this household?

So if person 5 is person 2's grandparent (code 20) then it can be inferred that person 2 is person 5's grandchild. The table shows up to 15 persons & their relationships.

Additional Grandparent Derived Variables

The information collected at questions MaGcon01, MaGcn02 to MaGcn13 and MaGmar01 to MaGmar03 was used to derive a set of 15 variables which described the 'sets' of grandparents or grandparental 'units' with which the child/family were in contact and who were thus potentially sources of informal support. These 'units' consisted of either couple or individual grandparents depending on the responses given. The variables derived are:

DaGconta A: In contact with respondent's mother and father (who live together)'.
DaGcontb B: In contact with partner's mother and father (who live together)'.
DaGcontc C: In contact with respondent's mother (who lives alone)'.

F. Parenting styles and activities

Intro

The next few questions ask for your views on bringing up young children. I'm going to read out some things that people sometimes say about parenting and I'd like you to tell me how much you agree or disagree with each one.

For each item please choose the response that best indicates how you feel in general and not just about ^childname.

Permission to obtain health information

In this interview for Growing Up in Scotland, we asked some questions about pregnancy and the birth of your child. We also asked questions about your child’s health. To make this information complete, we would also like to find out more about the pregnancy and the child’s birth and health from health records.

These records hold data such as birth details, health visitor information, disabilities, immunisation, hospital visits and diagnoses. A summary of the data from the records is held by the Information Services Division (ISD) of NHS Scotland. To obtain any of this information we need your written permission for it to be released.

We would like to ask for your consent for us to send your name, address and date of birth (if you are the child’s natural mother), and those of your child, to ISD so that they can link it with their health records.

Like everything else you have told us, the information collected from these records will be confidential and used for research purposes only. Names and addresses are never included in the results.

By signing this form you are only giving permission for the linking of this information to routine administrative data and nothing else. We will not be able to obtain any other details about you or your child from medical records (e.g. GP records), or anything else.

Please ask the interviewer about anything that concerns you, call us free on 0800 652 2704, or e-mail us on gus@scotcen.org.uk with any questions. You can cancel this permission at any time in the future by writing to: The Scottish Centre for Social Research, 73 Lothian Road, Edinburgh, EH3 9AW.

Your Consent

- I have read or heard the information leaflet (and introductory letter) about the Growing Up in Scotland Study and have had the opportunity to ask questions.
- I understand that all the information about my child and me will be treated in the strictest confidence and used for research purposes only.
- I understand that the Growing Up in Scotland study wishes to obtain health information about me and my child from the records held by the Information Services Division of NHS Scotland.
- I understand that I may withdraw this consent at any time by contacting the research team in writing without giving any reasons.

I give my permission for the Scottish Centre for Social Research to pass my name, address and date of birth to the **Information Services Division of NHS Scotland**; and for my information to be passed back to the Scottish Centre for Social Research.

I give my permission for the Scottish Centre for Social Research to pass my child’s name, address and date of birth to the **Information Services Division of NHS Scotland**; and for my child’s information to be passed back to the Scottish Centre for Social Research.
